Lines indicated by numbers 9, 10, 11, 4, 5, 37, 33, 31, 32, are part of Knowles (4) survey.

Lines indicated by numbers 28, 34, 35, are part of Phips (3) survey.

The dwellings of Knowles, later Sherwood's, of Col. White, later Henry Hartwell's, also that of John Phips, although having no connection with the matter of locating the "New Towne," are shown on the plate, on account of being interesting features. Their positions were determined from references to them in the patents.

By comparing the "Plat" with the "Map of 'Iames Citty'," especially the Pott and Holder tracts, the relation of the two plates will be apparent.

"Back Street" appears to have lost its name before 1656, as Phips' patent of that year, although following its lines, does not refer to it by name. Charlestown's (Boston) "Back Street," dating from very early colonial times, survives under its original name.

ERRATA.
